General regulations:

Competition rules and regulations, the legal system, as well as the anti-doping rules of the German Swimming Federation (DSV) will apply. The competitions are open to all clubs that belong to the FINA via their National Swimming Federations.

FINA One Start Rule (SW 4.4) will apply. With this application, the enrolling clubs will make a written declaration, that all swimmers will be in good health and can verify this by a medical certificate, not older than one year. The current Competition License of Procedure of the DSV is expressly advised. Without adequate explanations, the application is rejected.

Competition pool: 50 m, 8 lanes, separated by wave killer lines. The water depth is 1.80 m throughout. The water temperature is 26 degrees Celsius. Time is measured by automatic timing (Colorado Time Systems).

A 25 m pool will be available for warming up/down during the competition.

The enrollments can be delivered via electronic mail (DSV or Lennex), along with registration form (DSV Standard Form 101) if you are from Germany. The electronic enrollments must be accompanied by an additional text file. Alternatively, the enrollments can be sent to the specified registration address on official reporting strips (DSV form 102), including entry form in accordance with the DSV standard. The competition definition file can be downloaded at #15.

In the 800 m and 1500 m freestyle events we are planning three runs, each with 8 participants - male / female – with one participant per lane. If we get more bookings, we may switch to two swimmers per lane or 16 per heat. Be aware that two swimmers per lane are measured semi-automatic! We will refuse registrations for events 1-4 if we are not able to end the session by 21:45

The heat and lane allocations are made according to the specified reported times without considering the vintages.
